Methodology and Logistics

Overview

- The following represents the results of a public opinion survey of voting age residents of Manitoba, Canada and North Dakota.

Study Sample

- A total of 600 respondents, 18 years of age and older were interviewed. The sample breakdown is as follows:
 - 300 Manitoba respondents
 - 300 North Dakota respondents
- The margin of error for the total 600 person survey is $\pm 4.0\%$, 19/20 times, while the margin of error for each of the North Dakota and Manitoba samples is $\pm 5.6\%$, 19/20 times.

Survey Method

- The survey was conducted using computer-assisted techniques of telephone interviewing (CATI) and random number selection.
- Interviews were conducted in the respondents preferred language of choice.
- A total of 30% of all interviews were monitored and the management of Oraclepoll Research Limited supervised 100%.

Logistics

- Interviews were conducted between the days of June 20th to June 23, 2006.
- Initial calls were made from 5:30 p.m. to 9:00 p.m. with call-backs of no-answers and busy numbers made on a (staggered) daily rotating basis up to 5 times (from 10:00 a.m. to 9:00 p.m.) until contact was made. In addition, telephone interview appointments were attempted with those respondents unable to complete the survey at the time of contact.

Executive Summary

The quality of water in lakes and rivers (21%) was the most cited top of mind water quality issue among Manitoba residents, followed by clean or safe drinking water (19%), pollution (11%), e-coli, bacteria or algae and dams or water diversion (4%). A total of 29% were unsure or did not know of any issue that came to mind.

On the other hand a high 46% of North Dakota residents were unable to name a top of mind water quality issue or were unsure. Those with an opinion named clean or safe drinking water (20%), the quality of lakes or rivers (10%), flooding (7%), chemicals in the water (7%), pollution (6%) and dams (4%).

Almost nine in ten (89%) residents from both North Dakota and Manitoba claimed that the quality of water in lakes and rivers is important to them. More Manitoba respondents (94%) compared to those from North Dakota (84%) stated that the quality of water was either important or very important.

Awareness of the decision to build the Devils Lake outlet was higher among Manitobans (63%) than North Dakotans (53%). When asked about their support or opposition to the project, a high 78% of voting age Manitoba residents oppose the Devils Lake outlet compared to only 7% that back it, while 15% were unsure. On the other hand a low 12% of North Dakota voters oppose the outlet while a 66% majority support it and 22% did not know.

Despite the majority support for the Devils Lake outlet in North Dakota, 55% of that States resident's as well as 76% of Manitobans support referring the issue to the International Joint Commission. In addition, 63% of North Dakotans and 89% of Manitobans back putting a moratorium on the Devils Lake outlet until both Canada and the US agree that the water is safe.

However there remains a divide among residents on both sides of the border when it comes to the future of the outlet. 64% of Manitoba respondents support permanently

closing the Devils Lake outlet and 19% oppose closing it. In contrast, only 8% of North Dakota respondents back the closure of the outlet while 74% that oppose any move to close it.

Respondents were also asked to rate their level of concern with a series of issues related to the Devils Lake outlet, revealing that a very high number of Manitobans and a majority of North Dakotans are concerned with the following three areas

- 79% of Manitoba and 54% of North Dakota residents are concerned with polluting or contaminating the Sheyenne River
- 97% of Manitobans and 51% of North Dakotans are concerned with polluting or contaminating Canadian waters
- 63% of those living in Manitoba and 55% of residents south of the border are concerned with harming sport and commercial fisheries in North Dakota

Furthermore, 88% of Manitoba voters and almost half of those in North Dakota or 47% are concerned with harming sport and commercial fisheries north of the border. A high 88% of Manitobans are concerned with releasing invasive species from Devils Lake into Lake Winnipeg as are 41% of North Dakotans.

A strong percentage of Manitoba and a significant majority of North Dakota respondents also agree with the following.

- *“There should be no operation of the Devils Lake outlet without protection such as a filter against pollution and invasive species in place” (Manitoba – 94% agree & North Dakota 61% agree)*
- *“As a “good neighbor” North Dakota should not allow polluted water to enter Canada” (Manitoba – 96% agree & North Dakota 67% agree)*

A strong 91% majority of those residing in Manitoba also agree that *“The Government of Canada should take all possible measures including legal action to protect Canadians against the polluted water of Devils Lake”* compared to 44% of residents of the US state that agree.

There appears to be greater convergence among residents on both sides of the border when it comes to the State allowing higher levels of pollution in Devils Lake. A low 6% of Manitoba voters and only 17% of the North Dakota electorate agree with the States decision to allow more polluted water to flow from Devils Lake.

Residents of each jurisdiction also tend to believe their own state or provincial governments information when it comes to issues related to Devils Lake although the believability of information numbers are still low.

- 49% of North Dakotans believe their government compared to 10% of Manitobans that believe the information that they hear from the State on Devils Lake
- 54% of Manitobans believe their government compared to 23% of North Dakotans that believe the Province

In addition, 54% of Manitoba residents believe information from environmental groups as did a lesser 23% of those from North Dakota.

	Total	6.7%	11.7%	23.7%	22.3%	35.3%	.3%

		Q5. Do you oppose or support the "Devils Lake outlet"?			Total
		Oppose	Support	Don't know	
AREA	Manitoba	78.0%	7.3%	14.7%	100.0%
	North Dakota	12.0%	66.0%	22.0%	100.0%
	Total	45.0%	36.7%	18.3%	100.0%

The governments of Manitoba, Canada, the states of Minnesota and Missouri, the Great Lakes Commission, several U.S. Indian reservations, and environmental groups oppose any diversion project that results in Devils Lake water entering Manitoba. They have also called for a full environmental impact assessment of the project citing numerous environmental concerns.

Do you oppose or support each of the following.

		Q6. Referring the Devils Lake outlet to the International Joint Commission, a U.S.-Canadian organization that resolves trans-boundary water disputes			Total
		Oppose	Support	Don't know	
AREA	Manitoba	12.7%	76.0%	11.3%	100.0%
	North Dakota	26.0%	55.3%	18.7%	100.0%
Total		19.3%	65.7%	15.0%	100.0%

		Q7. Putting a moratorium on the Devils Lake outlet until both Canada and the US agree that the water is safe			Total
		Oppose	Support	Don't know	
AREA	Manitoba	9.3%	88.7%	2.0%	100.0%
	North Dakota	30.0%	63.3%	6.7%	100.0%
Total		19.7%	76.0%	4.3%	100.0%

		Q8. Permanently closing the Devils Lake outlet			Total
		Oppose	Support	Don't know	
AREA	Manitoba	18.7%	64.0%	17.3%	100.0%
	North Dakota	74.0%	8.0%	18.0%	100.0%
Total		46.3%	36.0%	17.7%	100.0%

Please rate your level of concern over each of the following issues raised by opponents of the Devils Lake outlet using a scale from one not at all concerned to five very concerned.

		Q9. Polluting or contaminating the Sheyenne River						Total
		Not at all concerned	Not concerned	Neither concerned nor unconcerned	Concerned	Very concerned	Don't know
